EXTREME TEMPERATURE, MULTIPLE APPLICATION

PERFORMANCE CARTON SEALING TAPES

You insist on superior performance from your carton sealing tape. No matter the application or the temperature conditions in which you seal or store cartons, you expect a reliable and secure seal. It's why AP Series acrylic carton sealing tapes from Shurtape® are crafted to perform – whether you need strength for bulky packages or a quick stick on corrugated boxes.

From light to heavy duty applications, AP Series is perfect for any job. It's engineered to bond well in temperatures ranging from -20 F to 180 F, and is available in six grades that range in thickness from 1.6 mils to 2.5 mils. UV-resistant to protect against yellowing, AP Series protects labels and printed surfaces from weather and handling, and is designed to give you the long-lasting performance you demand.
